

Torque Hinge and Industrial Components Search Tool

"Sasuga-kun" is online

Reduces search time / increases efficiency

<http://contents.sugatsune.co.jp/en/motion/selection/>

Industrial components and furniture hardware manufacturer Sugatsune Kogyo (HQ: Tokyo, Japan) has released an online search tool for torque hinges and related components. It is free to use and open to the public.

Background

In order to properly select a torque hinge, it is important to know the moment and other calculations. There are often many different products that can be utilized but it is hard to know which one to use. This tool solves this problem incredibly fast and simply.

Unique Functionality

Simply input the size, weight and a few basic items and Sasuga-kun quickly delivers all the available options. The tool automatically iterates over the moment and provides a simulation of opening at different angles. The products listed are all part of our "Motion Design Tech" lineup, with more than 170 items listed and growing. Sasuga-kun will make designing and planning smoother, faster and easier. The website is easy to use, intuitively designed and beginner friendly with a fast learning curve.
