Solutions for OEM

Origin of the word Furniture - early 16th century (denoting the action of furnishing):

from French fourniture, from fournir, from Old French furnir 'to furnish'.

Furniture : Noun

1. The movable articles that are used to make a room or building suitable for living or working in, such as tables, chairs, or desks.

Synonyms: furnishings, house fittings, fittings, fitments, fixtures, appointments, appliances, effects, amenities, units, equipment.

2. The small accessories or fittings that are required for a particular task or function.

Starting as a manufacturer in 1930, SUGATSUNE has been able to successfully provide solutions for architectural hardware and furniture fittings to a variety of customers all across the globe. With strength in cabinetry hardware, unique lateral solutions and a plethora of hinges, we also dedicate our range of products as a complete solution for OEM's. SUGATSUNE core competency translates into product research and its development aiming at customer satisfaction, innovations and higher value for their designs and customization - both in quality and craftsmanship. Certified with ISO9001 & ISO14001 standards and patented products with soft-close dampening technology LAPCON, we can provide various solutions to both industrial and architectural OEM's, where a smooth and controlled movement is desired. This specialization will help honour our commitment of being a thorough professional and to benefit all our channel partners in the modular furniture, kitchen manufacturing and word working industries. Being a Japanese brand, LAMP by SUGATSUNE products are known for their quality and design. This brochure highlights some of our products and together we plan to move ahead to work with the best of the OEM's and fathom high quality standards through expert craftsmanship and services.

Door & Cabinet Locks. Security for Valuables and Confidential Information.

Sugatsune has built a reputation for excellence through innovative component hardware solutions. We engineer durable cabinet locks that combine unparalleled quality and security for homes and businesses. Protect your residential or commercial interior spaces by incorporating a stainless-steel cabinet door lock that has been meticulously crafted for sustained use in cabinets, drawers, and doors. Improve the security of glass doors, wood cabinets, and drawers with precision-engineered locks. Builders value Sugatsune's cabinet locks for their quality and finishes. These models offer the ultimate security with over a thousand key change options. Builders and homeowners can incorporate push locks or plunger locks for metal-framed glass doors and sliding wood doors. Retailers can use them for display cases and have the option to have multiple display cases or enclosures all keyed the same.

Lapcon comes from LAMP CONTROL.

Lapcon is the name given by Sugatsune to its range of controlled closure solutions. It was first used in 1989 with the SDS cabinet stay. This was the first such product in the world and created a new trend for openings in the kitchen in Europe and other countries. Nowadays, Lapcon technology extends to architectural and industrial solutions where a smooth and controlled movement is needed.

SOFT CLOSE SLIDE

Sugatsune offers a vast selection of drawer slides, drawer glides, and linear drawer guides, including functional ball bearing full extension slides, 3/4 extension slides, soft close slides, and linear rails. Ball bearing slide linear rails provide smooth, quiet operation for your storage spaces and compartments with dependability and quality motion.

Our stainless-steel drawer glides and linear guides are featured on a variety of applications from kitchen, commercial kitchens, hospital furniture's, hospital equipment's, medical devices, automotive, transportation, aerospace, food equipment, enclosures, and outdoor furniture pieces.

Whether you're looking for an aluminium linear rail or a stainless-steel drawer slide, or high-temperature ratings, you'll find it in our extensive range of high-performance slide and rail hardware solutions for your application.

Customization for Specialized Applications

Oven rack slides, freezer drawers, dishwasher slides, battery trays, access rails, or anything you need to move, we can help you find the solutions. Our standard selection of drawer slides and linear guides will solve most of your needs, but we are always eager to solve specific problems with custom designs.

Create more functional and aesthetically pleasing spaces in almost any indoor environment by mounting decorative or task-specific panels onto existing structural surfaces using **Fast mount®** Panel Mounting Systems. Fast mount mounting clips greatly simplify, streamline, and speed up the installation process of wall and ceiling panels.

- These clips and fasteners can be mounted to all common frame materials, including wood members, aluminium extrusions, cinder blocks, and even drywall. They can also be mounted to stationary or non-flexing objects such as furniture and industrial equipment.
- These clips support the mounting of various types of hard panels as well as cushion or textile “panels” such as might be used for soundproofing or decorative tapestry.

Mount Almost Anything

You can mount all kinds of materials with the right Fast mount panel mounting clip, including:

- Wood panels
- Plywood
- Sandwich or composite panels
- Lightweight metal panels
- Plastic
- MDF
- Plastic
- Fiberglass
- Fabric
- Acoustic materials

As long as it's not too heavy (e.g., stone slabs) or brittle, you can probably mount it with Fast mount mounting clips.
